つぎの英文をよく読んで、下線部を和訳しなさい。

The number of Americans who read daily newspapers is decreasing. Today people who would have read a newspaper twenty or thirty years ago turn to other media including the Internet, cell phones, and 24-hour cable television networks for the news, which they can get any time. What's more, they don't even have to read it any more. They can just download the news stories they want, plug in their earphones and rest their eyes.
